

## SPIRITUAL SATANISM YEAR 2080

by [HoodedCobra666](#) » Tue Feb 27, 2018 8:22 pm

There is a very particular thing in the current time of Spiritual Satanism existing. Nor bad or ideal, but very particular.

On one hand, we come too early. People are still afraid, brainwashed, lied to and scared. Depending on ranges from outright robotised into an enemy drone, to people who are partly free, the situation is only now becoming better. Therefore the enemy control is still very strong. On the other hand, we could not by any means come later - this would be deadly and devastating for where this world is heading.

So we can say we are late, early, but also in time at the same moment.

It's becoming better because of our spiritual warfare.

However at the pace and how this civilization has evolved after the momentary loss of the National Socialists in WW2, the Jewish power has ascended to heights of might impossible to topple by normal means.

The people who are supposedly 'waking up', are only going around an awakening which has started before. They move extremely, extremely slowly. The Jews in the next two decades would have been controlling their brains with nanobots, and these people hug trees and they pretend they know everything. They as such preach defeatism as they see this very fact. In other words this war, realistically speaking, and without us existing, would be lost. Humanity would be destroyed.

The Gods however do not sit idle. In order to dissect a rapid growing tumour, the Gods have picked people who can see past the barrier of massive brainwashing, thoughtforms, mass confusion, and many other aspects. And they banded us here as a unit to turn the above into Victory, against circumstances largely impossible. Truly impossible. The average "Pagan" or the most virulent anti-Christians, have never succeeded in doing anything serious to the enemy. This is because the Gods do not just throw their secrets around.

As they had no knowledge and no influence whatsoever. Fear of the 'dark side' prevented them of seeing the True Light hidden in the Dark Side. Our affinity and bravery to cross over through the 'dark portal', is actually proof of our decisiveness in what our aspirations are. Many people blame us for this but they are dependent on us whether they admit it or like it or not. Sometimes it's almost as if they prayed to die instead rather than accept their position in this whole thing.

What is impossible for them is fully possible for us. We are not bound by the same possibilities nor the same knowledge limitation. The Gods give knowledge. Therefore we do not have the same rules on possibilities.

The people that now question us and speak of us in disrespect, after the enemy is destroyed, they will come begging for forgiveness. Satan's name will be practised as SA-TA-NA-MA and people will massively become Nagas again, which is the rising of the Serpent. Sooner or later the world

will understand our objective.

Imagine how impossible it has been to get Hitler to be understood again. After closely a century of lies. We achieved this and it happened largely. Now everyone knows what actually went down. Little by little, level by level, people woke up to the fact that this man came only to help, fighting against time. And giving us time as a result.

Same as Hitler and the NS, we come before our time. Way before. Hitler would be understood quite possibly one century later, as in the average person conveying the full message of their struggle. He came way before. Linearly speaking our appearance was deserved on the planet at 2080 or deep well into the Age of Aquarius. When people would have knowledge and further understanding. However the enemy makes that impossible and the Gods demand we lift the spiritual dross out of humanity to build the future.

In essence, we are the ones sacrificing, unto ourselves and to save the masses from their so called major wrongdoings. The enemy has hijacked this story. This is from Odyssey, Odysseus loses his kingdom and it becomes occupied by the cesspool of life. He has no allies, but he has the Gods on his side. Every power is against him. His form is changed and nobody understands him, he receives only ridicule. But when Odysseus absolves his kingdom, he gains his crown again.

We are fighting against time, and we are giving the world further time. Our battle will be remembered in the ages, but the most important thing people should focus on is their standing with the Gods. For they will be on our side forever and we must not disappoint those who love and protect us so dearly.

Our war currently lies in 'year 2018', but the greatness of this struggle will affect circumstances in aeons to come.
